COCUNE

purity

positive effect

Using Cocune goes beyond just having a wash, because it transforms your skin from dry and chapped to silky soft - just like a cocoon. Cocune has a positive effect on all those who use it. Carers enjoy their work more, because they see that a washing ritual with Cocune's soft and mild products is a pleasant experience for everybody.

com fort able

wash and nourish

Washing with water and soap can be fairly unpleasant for people with a sensitive skin. Cocune gives you that wonderful feeling of being fresh and clean, but with the certainty of perfect care. Cocune has a complete line of products that protect as well as clean.

friendly

beautiful and special

Cocune has been developed for practical use. The products are convenient and have exactly the right features to make daily care as comfortable as possible. They turn washing into a wonderful and special moment again. In addition, every Cocune product complies with the highest quality standards.

nourishing

extra attention

The convenience of Cocune is a benefit in its own right. Washing with Cocune takes 40% less time than a traditional wash. That leaves you with more time for extra personal attention and care becomes care again!

change

effortless

The traditional way of washing with water and soap is fairly labour intensive. It requires wash bowls, wash gloves and towels. Cocune makes the process significantly easier by combining all the requisite items into one product. With Cocune wash gloves, shampoo caps and moisturising products washing becomes a completely different experience.

com plete

the essence

In summary, Cocune is about a complete solution in personal care. Would you like to turn waterless washing with Cocune into a success in your organisation?

We offer you all the necessary support during the implementation.

You can also count on us for support with the daily use of the various Cocune products. Ultimately there is only one objective - good care for everybody!

range

impregnated wash gloves

'Waterless washing' is the term that is used for a different way of washing bedridden people.

Previously washing somebody required two bowls of water, soap, wash gloves, towels and possibly cream, but now just one small pack of Cocune wash gloves that have been impregnated with a special cleaning lotion is all you need.

Cocune moist wash gloves are of the highest possible quality. The soft, thick disposable wash glove contains a skin-friendly lotion that provides optimum cleaning and nourishment for the skin. Particularly comfortable for a sensitive or damaged skin.

Wash gloves are available with fragrance or fragrance-free. First heat a closed pack in a microwave and then perform a full body wash. Drying is no longer necessary.

moisturizing wipes

Cocune moisturizing wipes are of the highest quality and extra large. The wipes can be used for a quick clean or to deal with obstinate dirt. As they are lightly perfumed, the wipes can also be used to freshen up quickly. The wipes are easy to use because of the hard resealable closure. They are ideal for cleaning face and hands.

refreshing hand wipes

Cocune refreshing moisturing hand wipes are ideal for cleaning your hands quickly and effectively. The packs contain 15 wipes and are easy to use because of the resealable packaging. Your hands feel soft, supple and fresh after use.

shampoo cap

With the Cocune shampoo cap hair washing is easy and without mess. The cap is impregnated on the inside with a special shampoo that does not have to be rinsed off with water. To provide extra comfort you can heat the cap in a microwave. Apply the cap over the hair and massage the skin for a few minutes. Remove the cap and throw it away. If you wish you can dry, comb and style the hair.

incontinence wipes

The Cocune incontinence wipes are developed as a 4-in-1 wipe and are ideal for quick, effective and gentle cleaning. The four properties are clean, hydrate, protect and refresh. The mild soap-free cleaning formula cleans faeces and urine effectively with one movement. The integrated barrier cream protects against moisture and helps the skin to repair without using additional cream. This reduces the number of actions for a sensitive skin and prevents any damage due to rubbing.

wash lotion

A wonderful lightly foaming lotion for cleaning, nourishing and protecting your skin. Ideal for the shower or as hand soap. It is best to apply the wash lotion on a slightly moist skin, massage gently and rinse. It is even better that you only need a little for an optimum result.

barrier cream

Besides hand cream and wash lotion, we also developed a barrier cream. This cream protects against moisture and is particularly recommended for a sensitive, extremely dry or damaged skin. The barrier cream is easy to spread and is available in a hygienic pump bottle.

wash & care foam

Our wash & care foam is extremely suitable for more heavy-duty incontinence purposes. For example, this foam ensures that faeces is easy to remove. The foam has been developed for a damaged skin and is soft, mild and gentle in use. Excellent in combination with the Cocune barrier cream.

hand cream

The hydrating hand cream offers excellent protection for skin that comes into frequent contact with water. The hand cream is moisture regulating and keeps the skin feeling supple and silky soft.
